

MLFRAMES

Multilens has been working with special optics for more than 25 years. We manufacture unique lenses and are able to produce solutions for the most uncommon sight disorders.

Over the course of these years, it has become increasingly clear how important the frame is for the optimal performance of the optical solution. The wearer will not gain the full benefit of the lenses unless the frame is suited to the properties of the lenses. It is for this reason that we have developed a range of frames that perform well with our various solutions.

Our frames have the following features:

- **Comfortable** – Most people wear their glasses during the greater part of the day. Obviously, it is vital that glasses do not chafe or leave a mark on your nose after wearing them all day.
- **Stable** – As some of our solutions weigh slightly more than regular glasses, stability is an important feature.
- **Unisex** – Many of our frames can be worn by women and men. But we also have frames that are more suitable either

for men or for women.

- **Eternal** – We have no ambition to try and keep up with the latest trends. We're more interested in frames that look good and stand the test of time.
- **Robust/Top quality** – The quality of our frames matches the optics we place in them. In other words, our focus is on quality of the highest class.

Framekit

All our frames come in a case with a lens cleaning cloth. We also offer frame kit, which include the frame, edging of lenses, a case and cleaning cloth.

All that needs to be added are the lenses. The frame kit means a better price and you don't have to worry that the edging might go wrong and cause expenses and delays.

MULTILENS

OPTICAL SOLUTIONS

VIDI
