

MLSIGHT OPTIMIZER

Power Boost when Needed

OPTICS: Convergence optimizing lenses with a power of +1.0, +1.5, +2.0 and +3.0

FRAME: Special designed frame, which is placed on top of existing spectacles.

TREATMENT: ML Prima+

WEIGHT: 25 g

Working at near distance with bifocal or progressive glasses can be strenuous. It often leads to poor working position and trouble finding the optimal optic spot in the lenses. To reduce these inconveniences and facilitate work at near distance, we have developed ML SightOptimizer.

ML SightOptimizer are spectacles with special designed optics that are easily hung on top of existing spectacles. This gives the user a solution with individually adapted optics, but better suited for near than his / her ordinary glasses. Among the advantages are better ergonomics and more comfortable seeing.

The benefits of ML SightOptimizer are an immediate “power-boost”, good optics throughout the lens, convergence-relaxing prism, anti-reflecting treatment and a thin and lightweight frame. ML SightOptimizer is suitable for people with reduced vision as well as for people who temporary need extra addition.

5 FEATURES THAT IMPROVES VIEWING AT NEAR DISTANCE:

 **ML SIGHT OPTIMIZER**

POWER-BOOST

Extra addition when the occasion requires, giving better and more ergonomic seeing.

WIDE VISUAL FIELD

Open frame with clear optics throughout the lens to optimize the vision at near distance.

PRISM OPTICS

Relieving prism for a more relaxed vision at near.

ANTI-REFLECTING TREATMENT

All ML SightOptimizer lenses are treated with ML Prima+. This improves the vision by creating a clearer and undisturbed image.

HANGON-FRAME

Smart and neat frame designed to fit most spectacles. The titanium frame makes it light & durable and the flexible temples makes it stable & comfortable for most spectacle wearers.

VARIANTS

- Sight Optimizer R1, Increases the habitual power about 1 dioptres.
- Sight Optimizer R3, Increases the habitual power about 1.5 dioptres.
- Sight Optimizer X1, Increases the habitual power about 2 dioptres.
- Sight Optimizer Y1, Increases the habitual power about 3 dioptres.

COST-EFFECTIVE

- The same solution works even if the habitual glasses are replaced.
- Several people can use the same solution.
- Cost less than terminal glasses.

TEST SET LOW

The test set contains following:

- 1 ML SightOptimizer R1
- 1 ML SightOptimizer X1
- 1 Fitting Guide

TEST SET HIGH

The test set contains following:

- 1 ML SightOptimizer X1
- 1 ML SightOptimizer Y1
- 1 Fitting Guide

The equipment is delivered in a box made of foam plastic with a cardboard case.
